**Minimum requirements:**

Windows 95/98/Me/NT/2000/XP

**Uninstaller included?:**

Yes

### Description

#### Our editors say:

Trillian simplifies your chat as well as your desktop and system resources by letting you simultaneously connect with the five most popular chat clients on the Web: Yahoo Messenger, MSN Messenger, ICQ, mIRC, and AIM. By importing your passwords, buddy lists, various client preferences, and other chat specifics into its own simple interface, Trillian acts as a single hub for all your chat traffic.

Installation and setup are simple, and the included features are actually useful. You can check supported e-mail accounts with a single click, view detailed event logs for each client, and, of course, chat your brains out. Plus, there are individual options for each supported chat client. Trillian supports skins too, but they could be easier to install. Another drawback, though not a fault of Trillian, is the occasional loss of contact with the AIM client feature. Blame AOL for not playing well with others, and credit Trillian for fixing these blocks quickly.

Also noteworthy is the fact that Trillian is truly free. It contains no adware of any kind and has no time or functionality limitations. So if you've always wanted to learn a new language, chat using Trillian and you'll be instantly multilingual.

Version 0.73 includes bug fixes and other minor enhancements.

#### "Not too bad"

I just started using Trillian and now they just came out with an update that fixes some things that bugged me most. It's still buggy, but what it does it does well.

**Drewstr da Roostr**

#### "The best I have seen.....!!!!!!!"

I use to clutter my desktop with chat windows from my different messengers, but not anymore!!! love Trillians so much that i let all my friends know how easy it is to use. Trillians is the best,I wont use anything else. Keep it up guys YOU ROCK!!!!!!!!!!!!!!
